# BIN CLEANING VEHICLE

## Improving hygiene in environmental services

Hyva's bin cleaning vehicle is the perfect partner for any fleet of refuse collection vehicles. It improves environmental service levels by ensuring the hygiene of garbage bins, at domestic or commercial premises, with no negative environmental impact through spillage or leakage.

### What is it?

The specialist vehicle is equipped with a high pressure and high temperature water cleaning system in a sealed compartment. It comprises two plastic water tanks (clean water and dirty water), two water heaters to heat up, a high pressure pump and a jet spray system within a sealed compartment.

The vehicle has a 2-bin capacity, handling 120 or 240 litre bins.

The vehicle is also equipped with a hand-held water jet lance.

*Better cleaning*

*More hygiene*

*More safe*

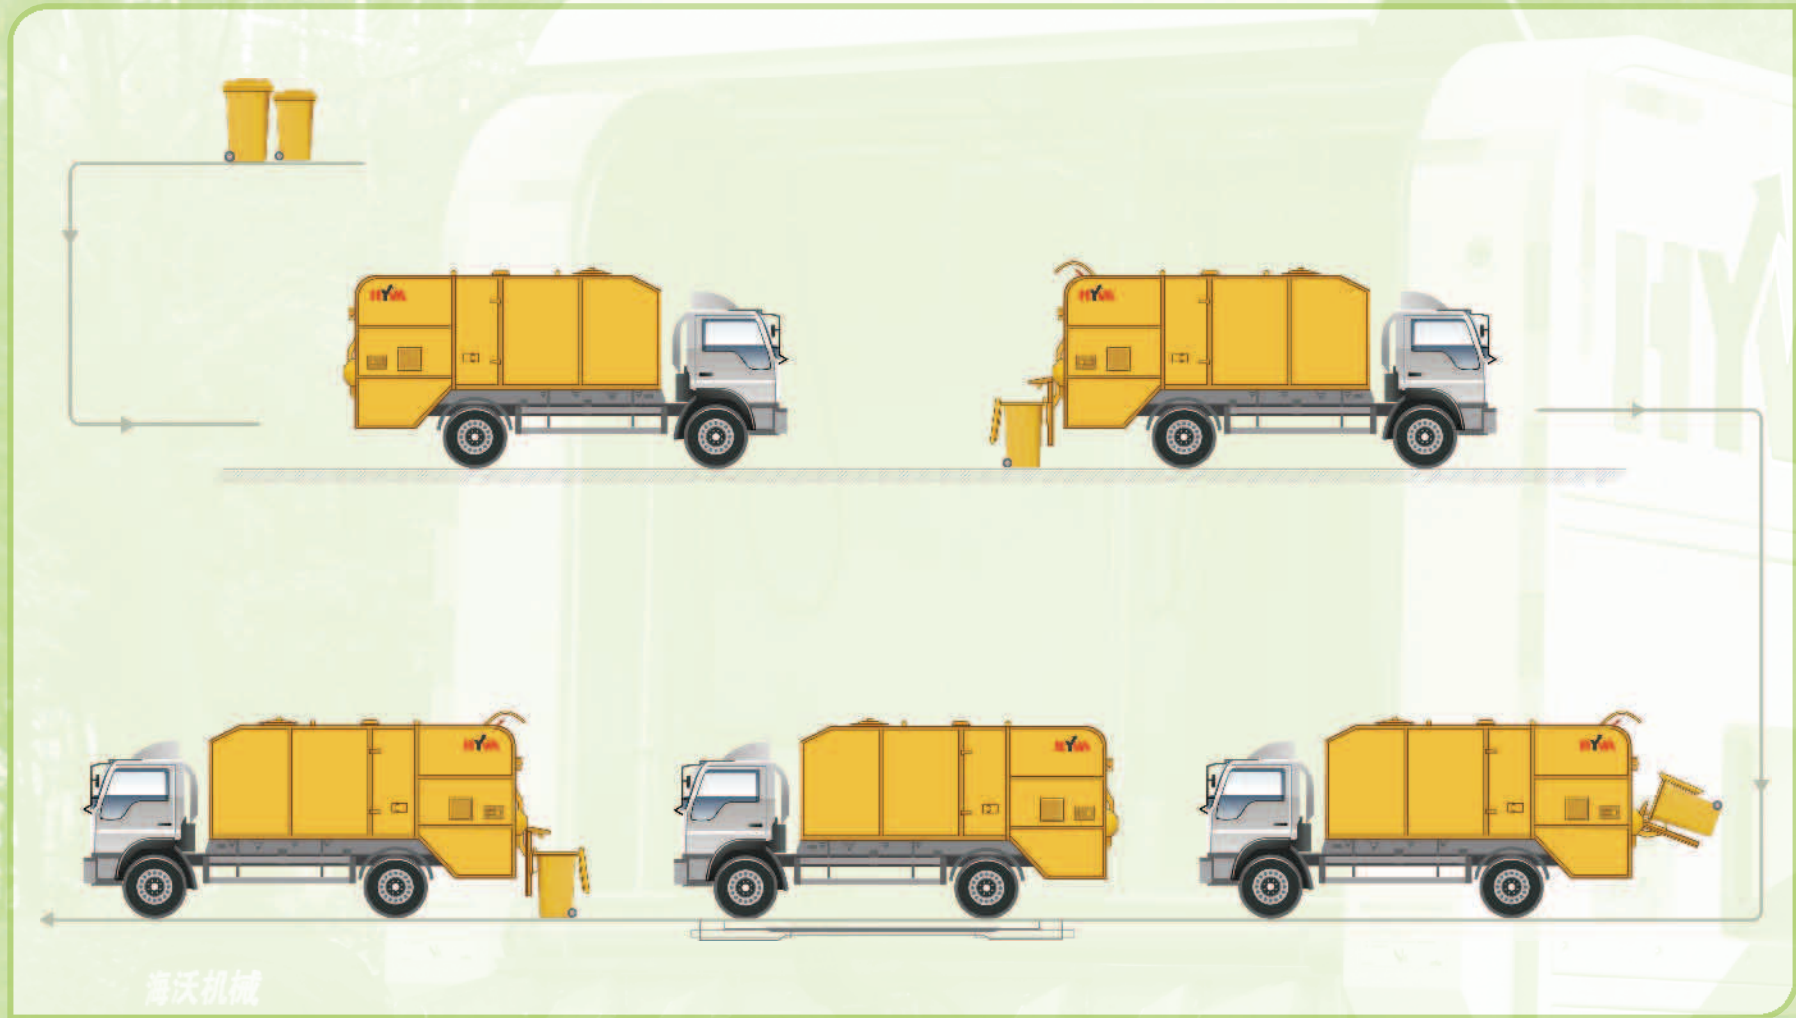

**CLEANER AND MORE HYGIENIC**  
*Clean (and heated) water is pumped at a high pressure to physically displace stains and residues.*

# INNOVATIONS THAT BRINGS A BETTER ENVIRONMENT
